

# TIES Dashboards: Monitoring What Matters

You get just the information you want—and only the information you want—in real-time, rendered elegantly and filtered to your specifications, in your TIES personal management dashboard.

## Make it yours.

### Examples of the real-time information you can choose to monitor in your TIES dashboards:

- 9-1-1 data—Houston, Seattle, Denver, Portland
- Blog and Twitter posts regarding large retailers
- Competition tracking
- Confidential internal company bulletins
- Crime data—historical, geographic
- Critical infrastructure locations (cell towers, pipelines, electric stations)
- Earthquake alerts and status monitoring
- Executive location (via handheld GPS)
- Facility security (surveillance, building blueprints)
- Fire weather (wildfire locations and forecasts)
- Global natural disaster incident alerts
- Global terrorist incident alerts
- Hazmat, chemical spills
- Homeland security news, legislation, RFPs, contracts
- In-store statistics (sales, local demographics)
- International security (daily intelligence reports for over 200 countries)
- Public health alerts, by country and by disease
- River flood gauge measurements
- Sensor data (e.g. chemical, radiological)
- Ships-at-Sea
- Soybeans (commodity prices, harvests, disease outbreaks)
- Strategic threats
- Supply chain data
- Sweden’s national 1-1-2 dispatch
- Terrorism alerts and incidents
- Traffic flow (mapped), accident alerts, live DOT cams
- Tsunami warnings and localized coastal evacuation maps
- Travel alerts and warnings
- Unmanned Aerial Vehicle (UAV) video surveillance reports
- Volcano status monitoring
- Weather reports and forecasts; special reports for severe weather

### In the queue, live soon:

- Amber Alerts
- Airplane accident and incident monitor
- Epidemic and biology hazard warning messages
- School incidents
- Special events (e.g. conventions, sports, concerts)
- USA UV index
